Foreward	vii
Acknowledgements	viii
Glossary of Terms	ix
Abbreviations and Acronyms	xi
1 Introduction	1
2 Approach to managing contaminated land	3
2.1 Policy and legislation requirements	3
2.2 The risk-based approach	4
2.3 Steps to be followed	6
2.4 Context and objectives	6
2.5 Technical expertise	8
3 Preliminary site assessment	9
3.1 Introduction	9
3.2 Desk study	10
3.3 Site reconnaissance	12
3.4 Developing a conceptual model	13
4 Site investigations	15
4.1 Planning and design of investigations	15
4.2 Fieldwork	17
4.3 Laboratory analysis	19
4.4 Factual reporting	20
5 Risk estimation and risk evaluation	21
5.1 Introduction	21
5.2 Refining the conceptual model	22
5.3 Approaches for estimating risks	23
5.4 Estimating risks - use of generic guideline values and approaches	24
5.5 Estimation of risks using site-specific values	25
5.6 Risk evaluation	26
6 Risk management	28
6.1 Introduction	28
6.2 Risk management objectives	28
6.3 Risk management options	29

	Page
7 Remedial action	31
7.1 Introduction	31
7.2 Selecting appropriate remedial measures	32
7.3 Implementing remedial action	33
7.4 Validation	34
7.5 Long-term monitoring and maintenance	34
Annex A	35
- Safety considerations	
Annex B	37
- Petroleum products typically found at retail sites	
Annex C	39
- Site investigation techniques for petroleum sites	
Annex D	47
- Analytical methods	
Annex E	50
- Selection of specialists	
Annex F	52
- Overview of remedial methods	
Annex G	56
- Case studies	
1 Operational service station with small petroleum spillage	57
2 Closed service station site intended for residential development	60
3 Operational service station site requiring remedial treatment	63
Annex H	64
- Publications and selected contact addresses
